React

Lead Designer
2018 - Present

Watching That

A video intelligence platform handling millions of streaming data points per day that I've helped design from the ground up. The role includes research, product design, data visualisation design, establishing a scalable design system and UI development.

Design Consultant
2019 - Present

Brightfield Group

Predictive consumer and market intelligence for the CBD and Cannabis industry. I'm helping the company create a professional, coherent design language across a wide range of reports and data portals. I'm also providing them with data visualisation expertise to help them improve the accessibility and efficiency of their products.

Lead Designer
2013 - 2018

WegoWise

The largest database of multifamily utility data in the US. I was responsible for product and marketing design and managing the design team. Instrumental in various aspects of an evolving design process:

- Collaborated with business development to explore early-stage product concepts.
- Established and promoted a 'design first' company culture with an emphasis on validating ideas via interviews and testing.
- Implemented and oversaw a scalable approach to developing front-end components.

Operations Manager
2009 - 2013

Create Today

A web to print startup and artist community (now offline). Led a diverse, distributed team building complex software to tight deadlines. I gained a wealth of experience in various aspects of agile development and project management. Helped take the business from concept through to successful acquisition.

Design Consultant
2009 - 2012

IGT

Designed and coded the player portal area of various state lottery sites, developed a reusable front-end framework in HTML, CSS and Javascript. The work also included usability, accessibility and inclusion analysis and iOS design.
